

MAGNETEX[®]

Magnetic Vortex Sessions

www.magnetex.org

The Magnetex[®] gently and effectively balances the entire body. Tests have shown beneficial changes in heart, brain, and blood readings (see website). The Magnetex[®] is highly effective for pain relief because it helps the body release dangerous, toxic materials from the cells and tissues. Once foreign materials are pulled from the tissues for excretion by the body (through its usual elimination channels), the strain on the muscles, nerves, glands, organs, and various systems is relieved, and the body can begin to repair itself and function properly.

The Magnetex[®] helps eliminate:

- ◆ Biofilms from Bacteria, Fungi, Parasites and Viruses
- ◆ Endogenous Wastes—Acids, Hormones, and Other Materials Produced by the Body
- ◆ Heavy Metals
- ◆ Microbial Wastes, Including Mycotoxins
- ◆ Nanoparticles (Wires, Particulates, Composites)

The ability of the Magnetex[®] to assist in the body's detoxification process allows it to help relieve:

- ◆ Aches and Pains
- ◆ Allergies
- ◆ Anxiety
- ◆ Brain Fog / Poor Concentration / Memory Problems
- ◆ Cellulite
- ◆ Chemical Sensitivities
- ◆ Chronic Headaches and Migraines
- ◆ Cold Extremities
- ◆ Dark Circles under the Eyes
- ◆ Depression
- ◆ Digestive Issues
- ◆ Fatigue
- ◆ Pain in Back, Joints, and Any Other Area of the Body
- ◆ Scar Tissue
- ◆ Skin Rashes
- ◆ Sleep Problems
- ◆ and more...

see page 2 for WARNINGS

WARNINGS

The Magnetex[®] must be handled correctly. The Magnetex[®] is sturdy, but the magnets inside (although powerful) are delicate. They, as well as the case, may break if you drop the device. The Magnetex[®] must also be protected from extreme temperatures and demagnetization.

Not a substitute for medical treatment. The Magnetex[®] will help you, but it's not a substitute for a healthy lifestyle and balanced diet. If you have a serious medical condition, please consult your doctor to see if the magnets are compatible with any treatments your doctor may want to provide.

The neodymium magnets in the Magnetex[®] are very powerful (for other objects)!

- ◆ Keep away from cell phones, computers, credit cards, and anything else that can become demagnetized. When OFF, the device has a 12-inch range (from the handle). When ON, the device's range increases to 36 inches (from the cap).
- ◆ When using an extension cord, use one that's heavy enough to carry the current drawn by the device. The thicker the wire, the smaller the wire gauge size (AWG) is. An AWG of 16 or lower is recommended for an extension cord 50 feet or less in length.

The neodymium magnets in the Magnetex[®] are very powerful (for YOU)!

- ◆ The Magnetex feels great, but MORE IS NOT NECESSARILY BETTER. The recommended amount of time is 15 minutes or less, 20 minutes tops. It's better to use it more often and for less time in each session, than less often and for more time in each session.
- ◆ Do not apply the Magnetex[®] to the abdomen after a large meal, as this can unfavorably change the gastric secretions and interfere with digestion. It's best to wait 2 hours after a meal before using the device. However, you may use the device on other areas of the body.
- ◆ Make sure your skin is clean before using the Magnetex[®]. It's best not to have toxins on your skin when applying the magnetic vortex.
- ◆ You may use the Magnetex[®] over clothing, but it's best if the cloth is made from natural fiber.
- ◆ Immediately prior to using the Magnetex[®], take nutritional supplements that will help bind the toxins that the magnetic vortex will release. Many people take: 1 gram of Vitamin C, 2-3 capsules of protease enzymes (protease eats protein particle wastes), and powdered or liquid zeolite. Activated charcoal is also useful.
- ◆ As with any detoxification protocol, toxins will be released during Magnetex[®] sessions. Make sure to drink lots of water (about half of your body weight) throughout the day.
- ◆ Pay attention to how you respond. Fatigue, fogginess, yawning, heaviness, tingling, nausea, and sneezing are all signs that toxins are being released. If you are experiencing too much of a detox reaction, turn off the Magnetex[®], drink more water, and rest.

Do NOT use the Magnetex[®] AT ALL under the following conditions:

- ◆ Do not place strong magnets near the heart without proper medical advice.
- ◆ Do not place magnets on someone who has a pacemaker.
- ◆ Do not use on or near areas that have metal implants in or on the body unless ok'd by practitioner
- ◆ Do not use magnets on pregnant women or on children under two years of age.
